ASSESSMENT:

Your enquiry of: EXAMPLE AMOUNT **Terms:** EXAMPLE TERM **Date:** 0000/00/00

A comprehensive trade survey could not be conducted due to insufficient trade references. However, based on the other researched information our assessment is as follows:

The subject is well established.

No judgements are recorded in the name of the subject on the Experian database.

Accounts are paid on due date.

Outside sources consider the subject good for the amount quoted if strictly in the way of business.

There is no reason why the subject should not be reliable for your amount and terms.

Risk Grade Analysis

Commercial Delphi - Researched Non SME

Experian has identified the business as Non SME with indate credit information.

Risk Grade

53

out of 100

The subject is considered a below average risk, with failure odds of 48:1. For every 1 bad company there are 48 good companies at this risk band.

Commercial Delphi is designed to predict the probability of business failure over a 12 month period using a combination of adverse, stability and where applicable relevant consumer information in the modelling process.

The model is dynamic, recalculating as and when information affecting the risk grade changes.

Areas influencing a poor risk grade can include:

- *Adverse information
- *New business
- *Lack of information
